Beijing · 2027 Graduate

EDUCATION

Beijing Jiaotong University

B.Eng. in Artificial Intelligence
School of Computer Science
2023.09 — 2027.06

AWARDS

- Beijing 1st Prize · OPC Innovation
- Beijing 3rd Prize · Computer Design

CORE STACK

Python · FastAPI
LangGraph · RAG
React · TypeScript
Vue 3 · Playwright
SQLite · ChromaDB
DOCX · Excel · PDF
Android · Offline

AI FULL-STACK · AGENT HARNESS · DOCUMENT INTELLIGENCE

Turning complex domain workflows into traceable, shippable AI systems.

AI full-stack engineer focused on Agent harnesses, intelligent documents, and production-minded business systems—constraining model uncertainty with state, rules, evidence, and human checkpoints.

EXPERIENCE

● Sinovac · AI Full-stack Engineering Intern

2026.07 — Present

Regulated Report Agent

- Built Excel ingestion, deterministic prechecks, Word template assembly, rule-based review, and source lineage.
- Constrained generation with business rules and evidence boundaries; contributed to integration, regression, and delivery acceptance.

● Qingyan Lingzhi · AI Full-stack Engineering Intern

2026.03 — 06

Tender Document Agent Harness

- Led an end-to-end workflow spanning parsing, requirement structuring, RAG, section and diagram generation, review, and DOCX delivery.
- Built LangGraph state orchestration, review-rewrite loops, task recovery, and human checkpoints; shipped multiple business prototypes.

SELECTED ENGINEERING

Agent orchestration

State graphs, tool adapters, cache invalidation, recovery, HITL

Documents & evidence

Excel/PDF/DOCX, template contracts, rules, provenance

Delivery & verification

Full-stack integration, automated QA, browser acceptance, offline delivery
